

# *Building for the Future Together*

*Jackie Moran  
West Lancashire CCG*

# *The transformation journey so far ....*

## *What we knew:*

- JSNA – role of
- Growing Ageing population
- Areas of deprivation and inequalities
- There are differences across West Lancs which collectively we could impact
  
- Growing hospitalisation rates
- Patients with multiple long term conditions increasing
  
- If we are to live within the available resources we know we have to -
  - Reduce unnecessary non-electives admissions to hospital
  - find alternative places for patients to receive the most appropriate care
  
- A need to improve – the right care, in the right place, at the right time for the local population / patients

# What we did ...

- We listened to the local population...
- Development of the *Building for the Future* vision; out of hospital focus
- Necessary; developing the right infrastructure to support: community care, primary care etc
- ‘Jigsaw pieces’ – fundamental to achieving our aims and delivering the vision e.g. VCFSE, Lancs Care Foundation Trust, Lancs County Council, West Lancs Borough Council
- At the heart of the vision - working in partnership, as a system to deliver joined-up, integrated care

## Turning the vision into a reality -

- New provider for community and urgent care (2017)
- Developed a bespoke outcomes framework to facilitate system working further – not ‘widgets’
- Grasping the wider alignment opportunities so elements of the system are complementing each other e.g...

# *Working with the local community*

Some current examples:

- West Lancashire CVS
- Crossroads
- Dementia Advisors Service
- Adult Carers
- Yewdale Counselling Service
- Stroke Association
- West Lancashire Bereavement Counselling service
- Palliative Care Sitting Service

Other –

- Virgin Care Outcomes Framework opportunities for 2018/19
- Additional funding 2018/19 100K
- Diversion / alternative schemes

# *The national direction of travel going forward – what does it mean locally?*

## Integrated Care System (ICS)

- Lancashire and South Cumbria level

## Integrated Care partnership (ICP)

- West Lancashire level

## Neighbourhood level

- 3 neighbourhoods: Skelmersdale, Ormskirk and North Parishes  
– tailoring care and support to local needs and requirements

## *Continued priorities & plans -*

- Continued **Out of Hospital** focus – reducing A&E attendances and length of stay in hospital, focus on step up / step down
- Diversion away from the acute (where clinically appropriate)
- **Urgent Care** - winter pressures
- **Prevention agenda** and role of **self care**
- **Primary Care** developing at pace and scale – working in neighbourhoods and the opportunities this brings for local needs and requirements
- Year 2 of the **community** contract – transformation happening
- **Mental Health** developments, both locally and at a Lancashire level
- **Well Skelmersdale** and other programmes
- Attracting new funding
- Importantly: **thinking differently** – role of **digital** and **innovation**.

## *Some specifics for consideration / discussion during workshop -*

- Support at home - facilitate discharge
- Reducing GP home visits - transport
- Palliative care
- Peer support
- Peer led services
- Support and training the use of self care digital tools
- Volunteers as part of the CERT team?
- Rehabilitation support
- Low level Podiatry

# Working as a system – now and going forward

*Integrate: 'to combine 2 or more things to become more effective'*

*Cambridge Dictionary*

*“In union there is strength”*

Aesop
